Large Cap Value Portfolio Commentary

Market Perspectives

As of the end of the third quarter, the U.S. stock market's year-to-date return was 10.6% as measured by the S&P 500 Index.¹ Although we have witnessed more volatility in recent periods, U.S. economic fundamentals remain strong with historically low unemployment, robust gross domestic product (GDP) growth and modest inflation. The Federal Reserve continues on its path to normalize interest rates now that the economy has clearly recovered from the last financial crisis, but is doing so in a gradual, measured and manageable fashion thus far. In brief, the U.S. economic backdrop and fundamentals appear favorable overall.

In terms of opportunities and risks, prospective growth rates and current valuations vary greatly by business and by industry at the moment. On average, the forward price-to-earnings ratio of the S&P 500 Index is approximately 18 times, which is neither inexpensive relative to history nor indicative of an overall market bubble. Today we see the greatest number of value opportunities in out-of-favor or out-of-the-spotlight businesses such as leading companies in the financial services industry, reasonably priced industrial companies and attractively priced North American shale companies as well as a focused list of technology companies whose long-term growth rates justify somewhat higher multiples.

At the same time, we are consciously avoiding certain risks with an eye to preserving capital. For example, we are not meaningfully invested at this time in consumer staples, telecommunication stocks or utilities stocks—groups normally associated with the so-called “dividend darlings.” While currently offering above-market

dividend yields, these sectors remain fairly expensive especially in light of their rather anemic (and in some cases *negative*) top-line growth and high payout ratios. Furthermore, they become even more expensive if operating margins, which are at the high end of their historical range, are normalized. In other words, as a truly active manager we will continue to focus on businesses that our analysis indicates are compelling risk/reward opportunities and avoid those that do not meet our standards.

Consistent with our philosophy of buying durable businesses at value prices and holding them for the long term, we are investing selectively in businesses that meet our investment criteria of strong balance sheets, durable competitive moats, and the potential for earnings to expand over time with attractive valuations.

Portfolio Review

The Davis Large Cap Value Portfolio holds three categories of businesses including in order of proportion:

- Dominant market leaders
- Lesser-known, “out-of-the-spotlight” businesses
- Contrarian investments²

Berkshire Hathaway is a diversified holding company with interests in insurance, reinsurance, railroads, utilities, manufacturing, retailing, and a host of other business lines.³ Under the strong leadership of Warren Buffett and team, the company has compounded book value at 19% per year since 1965. During that time Berkshire Hathaway has quietly evolved from a textile manufacturer to a well-run insurance operation and more recently to a diversified business with almost

This report includes candid statements and observations regarding investment strategies, individual securities, and economic and market conditions; however, there is no guarantee that these statements, opinions or forecasts will prove to be correct. Equity markets are volatile and an investor may lose money. **1. Past performance is not a guarantee of future results.** **2.** While we research companies subject to such contingencies, we cannot be correct every time, and a company's stock may never recover. **3.** Holdings discussed in this commentary are selected according to objective, non-performance-based criteria. They are chosen each quarter according to a consistent methodology based on their weight in the Davis Advisors Large Cap Value model portfolio as well as recent purchases and recent sales and are intended only as illustrations of the Davis Investment. They are not recommendations to buy, sell or hold any security. Individual account holdings may vary.

two-thirds of its earnings generated by nonfinancial operations. We believe Berkshire Hathaway is a financial powerhouse and well positioned for continued steady growth in intrinsic value well into the future.

Aetna, a representative out-of-the-spotlight holding in the Portfolio, is ranked among the five largest health insurers in the United States. The company has a strong negotiating position in most markets and has successfully branched into Medicare and Medicaid in addition to the company's commercial health insurance lines. We like Aetna's solid business model, good growth prospects and return on capital coupled with its fair valuation. Also worth noting is Aetna recently agreed to merge with CVS Health, a transaction that regulators are reviewing and that we expect may be approved in the coming months.

Our contrarian investments include General Electric, which we recently purchased in the Portfolio. General Electric is one of the largest and most diversified multinational corporations worldwide with products including aircraft engines, industrial products, oil and gas production equipment, power generation, and financial services. GE has presented compelling plans

to resolve issues surrounding the company's pension, debt, and insurance practices and focus GE on its core industrial businesses. Despite current lackluster performance in the company's power and renewable energy units, GE's focus on strengthening these core industrial businesses is expected to increase margins over time.

Among other recent Portfolio changes, we sold our position in Occidental Petroleum during the most recent quarter.

Overall, we believe our Portfolio is positioned to provide a diversified balance of durable, well-managed businesses with attractive growth prospects.

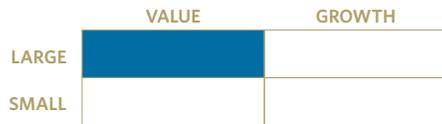

Since our firm's inception nearly 50 years ago, we have adhered to the same, time-tested investment philosophy and rigorous research process of buying durable businesses at attractive prices and holding them for the long term. The more than \$2 billion the Davis family and Foundation, Davis Advisors, and our employees have invested side by side with our clients' savings in similarly managed accounts and strategies remains a true sign of our commitment to and conviction in this enduring philosophy.⁴ ■

4. As of June 30, 2018.

Large Cap Value Portfolio Profile

September 30, 2018

Long-Term Capital Appreciation

Davis Large Cap Value is a portfolio of attractive businesses primarily in the U.S. selected using the time-tested Davis Investment Discipline. As one of the largest investors in the strategy, we have a unique commitment to client stewardship.

► Why Invest in the Davis Large Cap Value Portfolio

- **Equity-Focused Research Firm:** Established in 1969, Davis is a leading specialist in equity investing.
- **Portfolio of Best of Breed Businesses:** The Portfolio invests in businesses in the U.S. Utilizing rigorous independent research, we invest in durable, well-managed businesses with sustainable competitive advantages and attractive long-term growth prospects selling at a discount to their true value.
- **We Are Among the Largest Investors in the Strategy:** We have a unique commitment to stewardship, generating attractive long-term results, managing risks and minimizing fees.

All-Cap Portfolio Commentary

Market Perspectives

As of the end of the third quarter, the U.S. stock market's year-to-date return was 10.6% as measured by the S&P 500 Index and 10.5% as measured by the Portfolio's benchmark, the S&P 1500 Index.¹ Although we have witnessed more volatility in recent periods, U.S. economic fundamentals remain strong with historically low unemployment, robust gross domestic product (GDP) growth and modest inflation. The Federal Reserve continues on its path to normalize interest rates now that the economy has clearly recovered from the last financial crisis, but is doing so in a gradual, measured and manageable fashion thus far. In brief, the U.S. economic backdrop and fundamentals appear favorable overall.

In terms of opportunities and risks, prospective growth rates and current valuations vary greatly by business and by industry at the moment. On average, the forward price-to-earnings ratio of the S&P 500 Index is approximately 18 times, which is neither inexpensive relative to history nor indicative of an overall market bubble. Today we see the greatest number of value opportunities in out-of-favor or out-of-the-spotlight businesses such as leading companies in the financial services industry, reasonably priced industrial companies and attractively priced North American shale companies as well as a focused list of technology companies whose long-term growth rates justify somewhat higher multiples.

At the same time, we are consciously avoiding certain risks with an eye to preserving capital. For example, we are not meaningfully invested at this time in consumer staples, telecommunication stocks or utilities stocks—groups normally associated with the so-called “dividend darlings.” While currently offering above-market dividend yields, these sectors remain fairly expensive especially in light of their rather anemic

(and in some cases *negative*) top-line growth and high payout ratios. Furthermore, they become even more expensive if operating margins, which are at the high end of their historical range, are normalized. In other words, as a truly active manager we will continue to focus on businesses that our analysis indicates are compelling risk/reward opportunities and avoid those that do not meet our standards.

Consistent with our philosophy of buying durable businesses at value prices and holding them for the long term, we are investing selectively in businesses that meet our investment criteria of strong balance sheets, durable competitive moats, and the potential for earnings to expand over time with attractive valuations.

Portfolio Review

The Davis All-Cap Equity Portfolio holds three categories of businesses including in order of proportion:

- Dominant market leaders
- Lesser-known, “out-of-the-spotlight” businesses
- Contrarian investments²

Oracle, a representative market leader in the Portfolio, offers a wide array of enterprise information technology solutions including cloud applications, databases, and engineered systems to 430,000 customers in 175 countries.³ The company provides a wide choice of software, systems and cloud deployment models, including public, on-premises and hybrid clouds to allow businesses to work efficiently and simplify workflows. Oracle is the second largest enterprise software company, the largest database company by revenue and the second largest enterprise application company. Oracle's large market share, focus on expanding cloud-based solutions and reasonable valuation make the company an attractive addition to our Portfolio.

This report includes candid statements and observations regarding investment strategies, individual securities, and economic and market conditions; however, there is no guarantee that these statements, opinions or forecasts will prove to be correct. Equity markets are volatile and an investor may lose money. **1. Past performance is not a guarantee of future results.** **2.** While we research companies subject to such contingencies, we cannot be correct every time, and a company's stock may never recover. **3.** Holdings discussed in this commentary are selected according to objective, non-performance-based criteria. They are chosen each quarter according to a consistent methodology based on their weight in the Davis Advisors All-Cap model portfolio as well as recent purchases and recent sales and are intended only as illustrations of the Davis Investment Discipline. They are not recommendations to buy, sell or hold any security. Individual account holdings may vary.

A representative out-of-the-spotlight business is Quotient Technology (formerly Coupons.com), a leader in digital coupons including online, print, social media, and mobile coupon promotions. The company's rapidly growing digital transactions, unique customer database and large scale presence in digital coupon disbursement set it apart from the competition, creating a favorable long-term outlook for revenue growth combined with a reasonable valuation.

Aptiv PLC, another out-of-the-spotlight business, is a global manufacturer of auto parts oriented toward green technology, advanced safety and connectivity solutions for the auto market. Under the strong leadership of CEO Kevin Clark, we anticipate Aptiv will continue enjoying growth over the years ahead due to tailwinds in active safety and high voltage demand in the auto industry. In addition, the company plans to expand into adjacent markets with its technology, such as aerospace and commercial vehicles.

Among our more contrarian investments is Wells Fargo, a financial services company that is attractively valued given its strong position across North America in banking, insurance, investments, mortgages, and consumer and commercial finance services. Despite negative headlines facing the company today, Wells Fargo maintains two major competitive advantages: First, the company boasts a sizable, low-cost and stable retail deposit base that has historically enabled Wells Fargo to generate one of the highest net interest

margins in the industry. Second, Wells Fargo's credit and underwriting culture remains among the strongest in the industry as evidenced by historically below-average credit losses. With a current valuation of roughly 11 times earnings, we believe the company remains attractively priced even considering the negative impact of the recent controversies weighing on Wells Fargo's share price. The new management team that took the helm within the last two years is making good progress in addressing past deficiencies and we believe this augurs well for this investment over the longer term.

Among recent portfolio changes, EQT Midstream Partners was sold during the third quarter of 2018.

Overall, we believe the durable balance sheets and long-term earnings power of the companies that make up the Davis All-Cap Portfolio strongly position us to continue building shareholder wealth over time.

Since our firm's inception nearly 50 years ago, we have adhered to the same, time-tested investment philosophy and rigorous research process of buying durable businesses at attractive prices and holding them for the long term. The more than \$2 billion the Davis family and Foundation, Davis Advisors, and our employees have invested side by side with our clients' savings in similarly managed accounts and strategies remains a true sign of our commitment to and conviction in this enduring philosophy.⁴ ■

All-Cap Portfolio Profile

September 30, 2018

► Investment Discipline

The Davis All-Cap Portfolio applies the firm's signature research process to a portfolio of small, medium and large size companies.

- The Davis All-Cap Portfolio is team managed. The managers collaborate, sharing ideas and responsibilities for selecting the Portfolio's investments.
- The investment management team of the Davis All-Cap Portfolio has significant co-investments alongside clients in the same strategy. In addition, the team's compensation is tied to long-term investment results. These facts help to ensure an appropriate alignment of interests with clients.
- The Davis All-Cap Portfolio is appropriate for: 1) Investors who understand opportunistic strategies that are not bound by market cap, sector or industry constraints may offer the potential for attractive long-term results;¹ 2) Investors who need a diversified equity solution that offers access to small, medium and large companies; 3) Investors who already have an appreciation for Davis Advisors' signature investment approach, firm history and culture of stewardship.

Investment Management Team

Christopher C. Davis joined Davis Advisors in 1989. He has more than 30 years experience in investment management and securities research. He is a portfolio manager for the Davis Large Cap Value Portfolios and a member of the research team for other portfolios. Mr. Davis received his M.A. from the University of St. Andrews in Scotland.

Danton G. Goei joined Davis Advisors in 1998. He is a portfolio manager for the Davis Large Cap Value Portfolios and a member of the research team for other portfolios. Mr. Goei received his B.A. from Georgetown University and his M.B.A. from The Wharton School. He was previously employed at Bain & Company, Morgan Stanley Asia Ltd. and Citicorp. Mr. Goei speaks multiple languages and has lived in Europe, Asia and currently resides in New York City.

Dwight C. Blazin joined Davis Advisors in 1995. He was previously a consultant for IT Consulting and Systems Design. His research analysis has been shaped by working with Shelby M.C. Davis for more than five years. Mr. Blazin received his B.A. from Brigham Young University and his M.A. and Ph.D. from New York University.

Darin Prozes joined Davis Advisors in 2004. He previously worked for the Parthenon Group, a strategy consulting firm. Mr. Prozes received his B.A. from Princeton University and his M.B.A. from Stanford University.

Pierce B.T. Crosbie joined Davis Advisors in 2008. Previously, he worked as a research analyst at Davidson Kempner Capital Management in the distressed debt group, and in the mergers and acquisitions group at RBC Capital Markets. Mr. Crosbie received his B.A. from McGill University and his M.B.A. from the Harvard Business School and is a CFA charter holder.

Kent Y. Whitaker joined Davis Advisors in 2014. Previously, he worked at Amoco Corporation, British Petroleum, Hunt Energy Corporation, and Asarco. Kent holds a B.A. from Dartmouth College, a M.S. from Miami University and a M.B.A. from the Amos Tuck Business School.

Edward Yen joined Davis Advisors in 2013. Previously, he worked at Dodge & Cox and Lehman Brothers. Mr. Yen received his B.S. from the University of California, Berkeley and his M.B.A. from Stanford University.

This material may be shared with existing and potential clients to provide information concerning market conditions and the investment strategies and techniques used by Davis Advisors to manage its client accounts. Please refer to Davis Advisors Form ADV Part 2 for more information regarding investment strategies, risks, fees, and expenses. Clients should also review other relevant material, including a schedule of investments listing securities held in their account.

Davis Advisors is committed to communicating with our investment partners as candidly as possible because we believe our clients benefit from understanding our investment philosophy and approach. Our views and opinions include "forward-looking statements" which may or may not be accurate over the long term. Forward-looking statements can be identified by words like "believe," "expect," "anticipate," or similar expressions. You should not place undue reliance on forward-looking statements, which are current as of the date of this report. We disclaim any obligation to update or alter any forward-looking statements, whether as a result of new information, future events or otherwise. While we believe we have a reasonable basis for our appraisals and we have confidence in our opinions, actual results may differ materially from those we anticipate.

This report discusses companies in conformance with Rule 206(4)-1 of the Investment Advisers Act of 1940 and guidance published thereunder. The companies we discuss are chosen in the following manner: starting at the beginning of the year, the holdings from a Large Cap Value and an All Cap Core model portfolio are listed in descending order based on percentage owned. Companies that reflect different weights are then selected. (For the first quarter, holdings numbered 1, 11, 21, and 31 are selected and discussed. For the second quarter, holdings numbered 2, 12, 22, and 32 are selected and discussed. This pattern then repeats itself for the following quarters. No more than two of these holdings can come from the same sector per piece.); one recent purchase and one recent sale are also discussed. A sale is defined as a position that is completely eliminated from the portfolio before the end of the quarter in question. If there were no purchases or sales, the purchases and sales are omitted from the report. If there were

multiple purchases and/or sales, the purchase and sale discussed shall be the earliest to occur; no holding can be discussed if it was discussed in the previous three quarters. As this is primarily a domestic equity strategy, no more than one foreign holding will be discussed in any report. If more than one foreign holding would be discussed based on the criteria above, the holding with the largest percent of assets in the model portfolio would be chosen. However, if the model portfolio has an aggregate foreign holding percentage that is greater than 15% the commentary would include a discussion of the largest foreign holding in the model portfolio that has not been discussed in the previous three quarters.

The information provided in this report does not provide information reasonably sufficient upon which to base an investment decision and should not be considered a recommendation to buy or sell any particular security.

There is no assurance that any of the securities discussed herein will remain in an account at the time this report is received or that securities sold have not been repurchased. The securities discussed do not represent an account's entire portfolio and in the aggregate may represent only a small percentage of any account's portfolio holdings. It should not be assumed that any of the securities discussed were or will prove to be profitable, or that the investment recommendations or decisions we make in the future will be profitable or will equal the investment performance of the securities discussed herein. It is possible that a security was profitable over the previous five year period of time but was not profitable over the last year. In order to determine if a certain security added value to a specific portfolio, it is important to take into consideration at what time that security was added to that specific portfolio. A complete listing of all securities purchased or sold in an account, including the date and execution prices, is available upon request.

Broker-dealers and other financial intermediaries may charge Davis Advisors substantial fees for selling its products and providing continuing support to clients and shareholders. For example, broker-dealers and other financial intermediaries

may charge: sales commissions; distribution and service fees; and record-keeping fees. In addition, payments or reimbursements may be requested for: marketing support concerning Davis Advisors' products; placement on a list of offered products; access to sales meetings, sales representatives and management representatives; and participation in conferences or seminars, sales or training programs for invited registered representatives and other employees, client and investor events and other dealer-sponsored events. Financial advisors should not consider Davis Advisors' payment(s) to a financial intermediary as a basis for recommending Davis Advisors.

The **S&P 1500 Index** is comprised of the S&P 500, MidCap 400, and SmallCap 600, which together represent approximately 90% of the U.S. equity market. The S&P 500 Index is an unmanaged index of 500 selected common stocks, most of which are listed on the New York Stock Exchange. The Index is adjusted for dividends, weighted towards stocks with large market capitalizations and represents approximately two-thirds of the total market value of all domestic common stocks. Investments cannot be made directly in an index.

Davis Large Cap Value Portfolio

The performance of mutual funds is included in the Composite. The performance of the mutual funds and other Davis managed accounts may be materially different. For example, the Davis New York Venture Fund may be significantly larger than another Davis managed account and may be managed with a view toward different client needs and considerations. The differences that may affect investment performance include, but are not limited to: the timing of cash deposits and withdrawals, the possibility that Davis Advisors may not purchase or sell a given security on behalf of all clients pursuing similar strategies, the price and timing differences when buying or selling securities, the size of the account, the differences in expenses and other fees, and the clients pursuing similar investment strategies but imposing different investment restrictions. This is not a solicitation to invest in the Davis New York Venture Fund or any other fund.

Returns from inception (April 1, 1969) through December 31, 2001, were calculated from the Davis Large Cap Value Composite (see description below). Returns from January 1, 2002, through the date of this report were calculated from the Large Cap Value SMA Composite. Davis Advisors' Large Cap Value Composite includes all actual, fee-paying, discretionary Large Cap Value investing style institutional accounts, mutual funds and wrap accounts under management including those accounts no longer managed. Effective January 1, 1998, a minimum account size of \$3,500,000 was established. Accounts below this minimum are deemed not to be representative of the Composite's intended strategy and as such are not included in the Composite. A time-weighted internal rate of return formula is used to calculate performance for the accounts included in the Composite.

Davis Advisors' Large Cap Value SMA Composite excludes institutional accounts and mutual funds. Performance shown from January 1, 2002, through December 31, 2010, includes all eligible wrap accounts with a minimum account size of \$3,500,000 from inception date for the first full month of account management and includes closed accounts through the last day of the month prior to the account's closing. For the performance shown from January 1, 2011, through the date of this report, the Davis Advisors' Large Cap Value SMA Composite includes all eligible wrap accounts with no account minimum from inception date for the first full month of account management and includes closed accounts through the last day of the month prior to the account's closing. The net of fees rate of return formula used by the wrap-fee style accounts is calculated based on a 3% maximum wrap fee charged by the wrap account sponsor for all account service, including advisory fees for the period January 1, 2006, and thereafter. For the gross performance results, custodian fees and advisory fees are treated as cash withdrawals. A list of Davis Advisors' Composites is available upon request.

The investment objective of a Davis Large Cap Value account is long-term growth of capital. There can be no assurance that Davis will achieve its objective. Davis Large Cap Value accounts invest primarily in common stock of at least \$10 billion.

The principal risks are: stock market risk, manager risk, common stock risk, large-capitalization companies risk, mid- and small-capitalization risk, financial services risk, foreign country risk, emerging markets risk, foreign currency risk, depository receipts risk, and fees and expenses risk. See the ADV Part 2 for a description of these principal risks.

Davis All-Cap Portfolio

The performance of mutual funds is included in the Composite. The performance of the mutual funds and other Davis managed accounts may be materially different. For example, the Davis Opportunity Fund may be significantly larger than another Davis managed account and may be managed with a view toward different client needs and considerations. The differences that may affect investment performance include, but are not limited to: the timing of cash deposits and withdrawals, the possibility that Davis Advisors may not purchase or sell a given security on behalf of all clients pursuing similar strategies, the price and timing differences when buying or selling securities, the size of the account, the differences in expenses and other fees, and the clients pursuing similar investment strategies but imposing different investment restrictions. This is not a solicitation to invest in the Davis Opportunity Fund or any other fund.

The Davis All-Cap Equity is represented by Davis Advisors' Multi-Cap Equity Composite. Performance shown from January 1, 1999, through December 31, 2005, is the Davis Advisors' Multi-Cap Composite which includes all actual, fee paying, discretionary Multi-Cap investing style institutional accounts, mutual funds and wrap accounts under management including those accounts no longer managed. Effective January 1, 1998, a minimum account size of \$3,500,000 was established. Accounts below this minimum are deemed not to be representative of the Composite's intended strategy and as such are not included in the Composite. A time-weighted internal rate of return formula is used to calculate performance for the accounts included in the Composite. For the net of advisory fees performance results, custodian fees are treated as cash withdrawals and advisory fees are treated as

a reduction in market value. For mutual funds, the Composite uses the rate of return formula used by the open end mutual funds calculated in accordance with the SEC guidelines adjusted to treat mutual fund expenses other than advisory fees as cash withdrawals; sales charges are not reflected.

Effective January 1, 2011, Davis Advisors created a Multi-Cap SMA Composite which excludes institutional accounts and mutual funds. For performance shown from January 1, 2006, through December 31, 2010, the Davis Advisors' Multi-Cap SMA Composite includes all eligible wrap accounts with a minimum account size of \$3,500,000 from inception date for the first full month of account management and includes closed accounts through the last day of the month prior to the account's closing. For the performance shown from January 1, 2011, through the date of this report, the Davis Advisors' Multi-Cap SMA Composite includes all eligible wrap accounts with no account minimum from inception date for the first full month of account management and includes closed accounts through the last day of the month prior to the account's closing. Wrap account returns are computed net of a 3% maximum wrap fee. For the gross performance results, custodian fees and advisory fees are treated as cash withdrawals. A list of Davis Advisors' Composites is available upon request.

The investment objective of a Davis Multi-Cap Equity account is long-term growth of capital. There can be no assurance that Davis will achieve its objective. The principal risks are: stock market risk, manager risk, common stock risk, large-capitalization companies risk, mid- and small-capitalization companies risk, headline risk, foreign country risk, emerging markets risk, foreign currency risk, depository receipts risk, and fees and expenses risk. See the ADV Part 2 for a description of these principal risks.

Small cap companies have market capitalizations less than \$3 billion. Mid cap companies have market capitalizations from \$3 billion to \$10 billion. Large cap companies have market capitalizations greater than \$10 billion. Under normal circumstances, the Multi-Cap Equity Composite invests the majority of its assets in equity securities issued by companies with market capitalizations of less than \$20 billion.
